DETAILED ACTION

Drawings

The drawing received on 1/6/005 is acceptable.

Allowable Subject Matter

Claims 1, 3 - 7 and 9 are allowed.

The following is an examiner's statement of reasons for allowance:

Potyrailo (U.S. Pat. No. 6,500,547 B1) teaches as sensing apparatus comprising: a quartz crystal microbalance sensor having a surface; and a matrix of synthesized monomers (polymerized matrix) coating the surface (see col. 3, lines 65 - 67; col. 4, lines 1 - 12; col. 6, lines 44 - 47). Potyrailo does not specifically teach the use of a multifunctional monomer for use as an adhesive, wherein the multifunctional monomer adheres the polymerized matrix to the surface of the sensor. Schönfeld *et al.* (U.S. Pat. No. 5,958,787 A) do teach the incorporation of an intermediate adhesive layer comprising a polymer for the adhesion of a coating onto the sensor surface of a quartz crystal (see col. 4, lines 66 - 67; col. 5, lines 1 - 4). However, the cited prior art neither teach or fairly suggest the incorporation of bis(dehydroalanine), which has the formula as shown in claim 1, as a multifunctional monomer adhesive for adhering the polymerized matrix coating onto the sensor surface of a quartz crystal microbalance sensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
